Gun Violence

Across the nation and in all large cities completely controlled by the Democratic Party, the following has occurred:

- Felons were released early and in mass due to concerns for their safety due to Covid. (Why would it be safer for criminals in an uncontrolled general population instead of a controlled population with automatic healthcare?)

- In all of the violent BLM and Antifa "mostly peaceful" riots that looted stores or burned down buildings, and caused injuries/death, the police stood by and watched due to mayoral orders.

- For the few arrests, the violent rioters were processed at police stations and immediately released back into the "peaceful" riot.

- Progressive DAs required zero bail and immediately released these violent criminals back on the streets.

- With Progressive City officials and the police afraid to uphold the law, violent crime including murder by handguns has skyrocketed more in the last 1.5 years than many decades before.

Democrats blame all of the above on the increasing in gun sales.

- Mind you, it is women and minorities buying the majority of these guns due to fear of everything that Progressives are doing wrong.

- It is not the 1,000 total white nationalists in the US buying all of these guns and ammo. It is the millions of freighted diverse citizens doing the buying.

- With all of the escalating murder numbers, they are hand guns and not the evil "Assault Weapons". Per the FBI database, far more people are murdered by knives than so-called "Assault Weapons".

- Why is it that all of these huge criminal gun deaths increases never happen in cities controlled by Republicans? Makes you wonder doesn't it? Is it the gun or the politics?

Democrats peddle irrational fear and then convince the naïve population to back their radical agenda that never addresses the problem that Democrats created.
